

CAS INHOUSE COUNSEL (10 ECTS)

The course provides present and future in-house counsels with an introduction to relevant areas of the working methods of people working in the position of in-house counsel. This includes in particular areas such as legal strategy, compliance, risk management, corporate governance, contract drafting, litigation and dispute management and other important areas of law. In addition, participants will acquire knowledge and skills in the areas of personnel and leader effectiveness, project management, people management, etc., which are necessary for successful in-house counsel. The programme combines academic teaching and research with practice and at the same time promotes professional, methodological and social skills.*
