Certificate of Advanced Studies Compliance Management

2024

CAS COMPLIANCE MANAGEMENT (15 ECTS)

This CAS is aiming to provide current and future compliance officers with an introduction to relevant areas of the working methods of persons in the function of a compliance officer. Participants of the course should obtain knowledge in areas such as business process management, quality management, system engineering, life cycle networks, internal control systems, operational and financial risk management, information technology, as well as project and people management.

The course combines academic teaching and research with practical application and at the same time promotes professional, methodical and social skills, taking into account the international dimension and cross-border compliance requirements.*
